

EVT Projects

Raphaël de Fondeville

Federal Office of Statistics
Athens week, Paris

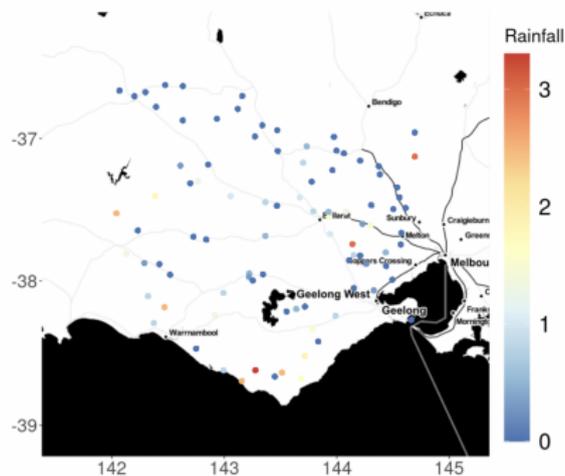

March 14th, 2022

Project overview

- ▶ Work in pairs.
- ▶ Select one of the three variables:
 - ▶ Rainfall,
 - ▶ Wind,
 - ▶ Temperature.
- ▶ Choose group number and variable type and fill the sheet.
- ▶ You'll get in return a team number and .RData file containing:
 - ▶ measurements at 5 locations;
 - ▶ measurements dates;
 - ▶ geographical coordinates of each location of measure.
- ▶ A detailed analysis of each dataset must be summarized in a report.
- ▶ Report will be graded and must be handed-out as Rmarkdown before March 24th 2022.
- ▶ Renkulab project with all material can be found at
<https://renkulab.io/projects/rdefondeville/practicals-extreme-value-statistics-athens>.

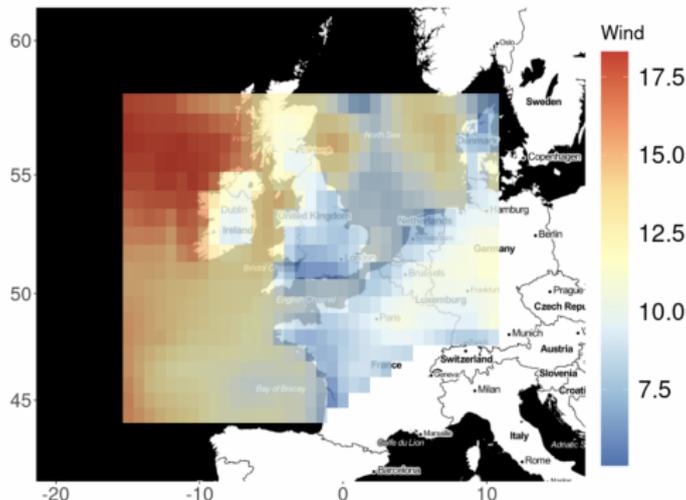

Rainfall in Australia

- ▶ Daily rainfall accumulation.
- ▶ 92 gauging stations in the state of Victoria, AU (near Melbourne).
- ▶ From January 1st1960 to December 31st2009.

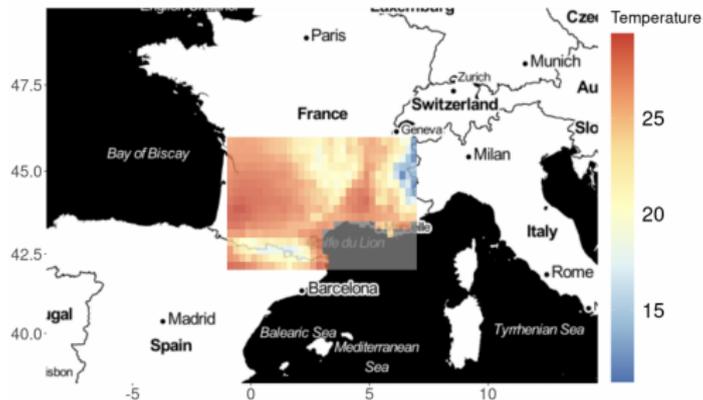

Wind speed over Europe

- ▶ Maximum wind gust sustained for at least 3s every 6 hours.
- ▶ 0.75° grid resolution over Western Europe.
- ▶ From January 10th 1979 to January 4th 2014.

Temperature in the South of France

- ▶ Mean daily temperature maxima.
- ▶ 0.25° grid resolution over the Southern region of France.
- ▶ From January 1st1950 to December 31st2016.
